AN EXPLANATORY NOTE CONCERNING
BIBLIOGRAPHIC SERIES NO. 4

The Bibliographic Series, pertaining to food and container literature, are published by the Library Branch of the Quartermaster Food and Container Institute for the Armed Forces for the purpose of aiding our scientists in developing better food and packaging techniques for the Armed Forces.

Realizing the importance of these bibliographies as reference tools, this office has taken every precaution to make certain the bibliographies are complete in every detail. For example, abbreviations are seldom used and journal titles are never abbreviated. The main entry is by author, and this is backed up with a detailed subject index. These, as well as other features used in the format of the Bibliographic Series, have proved very useful.

Abbreviations used are: Vol. (Volume), n. d. (where date is unknown), No. (Number) and p. (Page).

Members of the staff who assisted in the compilation of the Bibliographic Series are as follows: Dr. Gustav Weigend made the original literature search, Charles H. Hearst was responsible for the editing and proofreading duties, and typing chores were accomplished by Gladys M. Burris and Hortense L. Humble.

Titles of Previous Bibliographies

Bibliographic Series No. 1

Causes of Flavor and Off-Flavor in Fresh and Preserved Foods

PART I	FRESH AND PRESERVED FOODS (IN GENERAL)
PART II	FRESH AND PRESERVED VEGETABLES
PART III	DAIRY PRODUCTS
PART IV	FRESH AND PRESERVED MEATS AND FISH
PART V	FRESH AND PRESERVED FRUITS
PART VI	BAKING AND BAKERY PRODUCTS

Bibliographic Series No. 2

Color and Color Changes in Food Especially in Fruits

Bibliographic Series No. 3

Chromatography, Its Development and Various Applications
(Supplement to Follow in the Near Future)

Bibliographic Series No. 4
